

BARKER ELECTRIC DISTRIBUTION PROJECT WORK IN YOUR AREA

This map is a graphic and may not show exact locations.

Construction starting soon

Construction is expected to begin in June 2026 and continue through 2026. Construction will occur in the following areas:

- Market Street between 15th and 21st streets
- Lawrence Street between 18th and 21st streets
- 21st Street between Arapahoe Street and just east of Blake Street

During work, you may notice:

- Marking of utility lines and utility survey holes
- Road and sidewalk closures
- Traffic control
- Temporary changes to access
- Construction noise
- Equipment staging

We restore work areas to conditions required by permits as weather allows. Work areas may be left temporarily restored after construction until we can complete final restoration.

Overview

Xcel Energy is making important electric distribution upgrades in downtown Denver as part of the Barker Electric Distribution Project, being completed in conjunction with the Lacombe to Barker Underground Transmission Project. The work includes installing new underground distribution feeders and a duct bank to connect recent transmission improvements to the local distribution system.

The system in this area does not currently have the capability to reliably serve the customer electric need anticipated for the future. This work allows us to continue to provide safe, reliable electric service and enhances system resiliency.

Safety

Public safety is at the foundation of all we do. We take a proactive approach by implementing safety measures before, during and after construction. The project has been designed to meet federal and state standards and safety requirements for installing, maintaining and operating electric infrastructure.
